

WISH LIST 2023

ESCUELA CARACOL

JULY 2023

FOOD PROGRAM

18,000USD

Each year during the school term, the lunch program is held, a program to serve the students of Escuela Caracol. During the school days each student receives a nutritious snack prepared with love and based on the needs of the children's development and growth. This is intended to end malnutrition in our children and prevent students from eating junk food or fast food.

The food program is designed by the cook in conjunction with the Teacher's Council. The cook's name is Teresa Sancoy and she has been working since the school opened its doors in 2007, two of her children were among the first graduating classes and now she has a daughter in kindergarten. She is responsible for managing the budget for this program for both kindergarten and elementary school and she and her assistant cook for the elementary school children every day. For the kindergarten area the teachers do their annual planning of the meals that will be given during the week and the assistant teacher for each grade is responsible for the preparation of the food.

The food program as mentioned before has the purpose of nourishing in a balanced way all the students of Escuela Caracol, since we know the need that exists in the families, and the lack of information regarding healthy nutrition at home. Likewise, it is a way in which each student is also involved since in each grade of elementary school the children rotate in terms of food duties, detail below: some are in charge of bringing the food to the kitchen, some have the task of serving and all have the task of washing their utensils used. In the kindergarten area it is similar depending on the age of each student, generally it is the older ones who perform some of these activities, which generates confidence and responsibility.

A photograph of children playing with hula hoops on a dirt path in a lush, green, hilly environment. In the foreground, a boy in a red Spider-Man t-shirt and a girl in a dark blue shirt are focused on their hula hoops. A woman in a red shirt stands in the background, observing. The path is surrounded by dense tropical vegetation. The image is partially overlaid by a purple and pink decorative graphic in the bottom left corner.

ART AND MOVEMENT PROGRAM

10,000USD

The art and movement program is a fundamental pillar at Escuela Caracol because it gives each student the opportunity and the tools to express their feelings and emotions instead of expressing them negatively. Waldorf pedagogy is committed to art at all times, which is why manual work is essential within the curriculum of its students.

Watercolor is taught from kindergarten through 5th grade of elementary school, following a sequence according to the age of the students. In 6th grade, the chiaroscuro technique is introduced because of the students' processes at this age. Some diverse tools that the art program also contains is the free drawing technique that seeks to awaken creativity through stories, since they have the freedom to draw what they imagine. Also in 4th grade they work with clay, and in the higher grades they work with wood carving.

MUSIC PROGRAM

6,800USD

The music program is carried out every day in all classrooms, beginning in kindergarten with singing, followed in first grade with the delivery of a pentatonic flute to each student that will accompany them until 3rd grade, where they will begin to play the diatonic flute, and then in 4th grade they will begin to learn to play the guitar.

ENGLISH PROGRAM

4,800USD

The English program is an English class that is given to all students from kindergarten twice a week in each grade. We believe that this language is very important to learn because of the region where Escuela Caracol is located, which is touristy and will bring many benefits to the students.

KINDERGARTEN CLASSROOM BUILDING

25,000USD

For the third kindergarten class, this year we took a small classroom where the art class was taught, however despite the modifications the classroom has been too small to receive the students so we need to build another classroom especially for Kindergarten that is house style.

SERVICES

VARIABLE AMOUNT

- 3 computers: 2 for teacher use and 1 for marketing (1,500USD) .
- Lighting system, reinstallation of the electrical system of the 1st, 2nd, 3rd building.
- Dry wall around the school.
